Jainaba Jallow

Seattle,WA | jallowj@spu.edu| LinkedIn: https://www.linkedin.com/in/jainaba-jallow/ |

Skills and Qualifications

- **Technical:** 3-Phase Systems • Breadboard Design • Circuit Troubleshooting • Function Generator & Oscilloscope Operation • Soldering • Asset Data Organization.
- **Computer Software / Frameworks:** PSCAD • Excel • Jira • AutoCAD • Microsoft Office • Microsoft Entra • Multisim • MATLAB • QTSPIM • LTSpice • GitHub • Clion • Arduino IDE • Visio.
- **Programming Languages:** Python • C++ • MATLAB • Arduino • MIPS.

Education

Bachelor of Science in Electrical Engineering **Jun 2027**

Seattle Pacific University, WA

- **GPA:** 4.0
- **Relevant Courses:** Circuit Analysis and Design (Circuit 1) • Logic System Design • Data Structures
- **Courses in progress:** Power Systems • Electricity & Magnetism • Computer Organization and Assembly Language • Circuits 2

Associates of Science in Electrical Engineering **Jun 2025**

Highline College, WA

- **GPA:** 4.0
- **Courses:** Calculus I, II & III, Differential Equations, Linear Algebra, Mechanics, Object Oriented Programming

Relevant Experiences / Projects

BAJA SAE Electronics Team **Aug 2025 - Present**

Seattle Pacific University, WA

- Collaborate within a multidisciplinary team of engineering students to develop and integrate the vehicle's electrical monitoring systems.
- Design and integrate temperature, brake, fuel, and thermal monitoring sensors to provide real-time system diagnostics for vehicle safety and performance.
- Analyze sensor signal requirements and assist in proper power supply and grounding implementation to ensure reliable measurements.

Bandpass Sallen Key Filter Breadboard **Feb 2026**

Seattle Pacific University, WA

- Designed and built an analog frequency detector circuit to identify a specific target frequency (10 kHz, 17 kHz, or 25 kHz) from infrared-modulated audio signals, activating an LED indicator for the detected signal.
- Developed and verified the filter and detection stages through simulation, circuit analysis, and experimental testing to ensure accurate frequency discrimination and stable LED response.

Professional Experiences

IT Support Technician **Jan 2026 - Present**

Seattle Pacific University IT Support, Seattle, WA

- Provide frontline technical support for hardware, display systems, and network-connected equipment across campus academic and administrative facilities.
- Troubleshoot power-related device issues, projectors, and AV systems using structured diagnostic procedures.
- Maintain accurate technical records in Jira to support system documentation and asset tracking.
- Assist with equipment installations and technical support in classrooms, equipment rooms, and building infrastructure spaces.
