Jainaba Jallow

Seattle, WA | (206) 423-2890 | jallowj@spu.edu| linkedin.com/in/jainaba-jallow

QUALIFICATIONS

- Proficient in 3-phase power systems, field verification of electrical assets, and power system modeling.
- Skilled in circuit design and troubleshooting using breadboards, oscilloscopes, function generators, and soldering.
- Proficient in AutoCAD, Bluebeam Revu, EasyPower, Altium Designer, MATLAB, LTspice, and Microsoft Office.
- Experienced in programming with Python, C++, MATLAB, and Arduino.
- Strong communicator, collaborator, and problem solver, developed through design teams and student leadership.

EDUCATION

Bachelor of Science in Electrical Engineering, Seattle Pacific University **Jun 2027**

- GPA: 4.0, SPU 2026–2027 Bauman Scholar
- Relevant Coursework: Circuit Analysis and Design, Power Systems, Electronics I and II, Microcontroller System

Associate of Science in Electrical Engineering, Highline College **Jun 2025**

- GPA: 4.0, Dean's List, Phi Theta Kappa
- Relevant Coursework: Calculus I–III, Differential Equations, Linear Algebra, Mechanics

RELATED EXPERIENCE

IT Technician **Jan 2026 – Present**

Seattle Pacific University IT Support, Seattle, WA

- Resolve 15+ hardware, AV, and power-related equipment tickets per day across campus facilities.
- Document technical findings and asset information in Jira to maintain structured service records.
- Support equipment installations and troubleshot issues in building infrastructure spaces.

Electrical Engineering Intern **Jun 2026 – Sep 2026**

Port of Seattle, AVFI Electrical & Telecommunications Engineering, SeaTac, WA

- Verified 150+ electrical and 20+ communication assets, reconciling field conditions with records and documenting equipment locations, tags, and specifications.
- Developed and updated AutoCAD one-line drawings of concourses and cargo buildings using as-builts.
- Built an EasyPower model of Baggage Claim 15 & 16 from field conditions, nameplates, and design drawings to support power flow, short circuit, and arc-flash analysis.

TECHNICAL PROJECTS

ChangeUp Smart Baby-Changing Station, Senior Design Capstone **Sep 2026 – Present**

Seattle Pacific University, Seattle, WA

- Work with a 5-person multidisciplinary team to design a station with load-cell weighing and a motorized lift.
- Design the electrical subsystem, including load-cell weighing, stepper-motor drive, and power analysis.

Chill Pill Dispenser, Junior Design Project **Apr 2026 – Jun 2026**

Seattle Pacific University, Seattle, WA

- Designed an automated medication dispenser using a Raspberry Pi Pico state machine to drive 3 stepper motors.
- Built dual fingerprint authentication, physical locks, and audio/LCD alerts to restrict dispensing to the user.

Multilevel Voltage Regulator PCB, Electronics I Course Project **Apr 2026 – Jun 2026**

Seattle Pacific University, Seattle, WA

- Designed a dual adjustable DC power supply PCB in Altium using LM317, LM337, and LM78xx/79xx regulators.
- Fabricated and validated the prototype through simulation, testing, and percentage-error evaluations.

LEADERSHIP

Chair **Aug 2026 – Present**

IEEE at Seattle Pacific University, Seattle, WA

- Lead the club and coordinate with the IEEE Seattle Section to connect members with professional events, speakers, and networking opportunities..

President **Jul 2024 – Jun 2025**

Society of Physics Students, Highline College, Des Moines, WA

- Led weekly club meetings and organized hands-on projects, such as 3D printing a display of the solar system or design of a 4x4 LED cube.
